

Please keep the NJ Do Not Call Program intact. Before i signed up for this program i was repeatedly harrassed by telemarketers at all hours of the day and night for products or services in which i was not iterested. Now that I am part of this program the calls have dropped off to a managable level. and i would like for it to stay that way.

If companies are concerned that this cuts job opportunities, let them expand their customer service departments with human beings instead of automated systems.

thank you!!
